\* Kesilecek cam ölçüsü hesaplanırken, cam işleme/kesim cihazlarının 1mm hata payına sahip olduğu göz önünde bulundurulmalı ve cam hem enden hem de boydan 2mm kısa olmalıdır. Cam, kanat ile birleştirilirken kalan boşluklar "L" şekli verilmiş "mobilya kenar PVC" malzemesi ile doldurulmalı ve cam kenarlarına az miktarda (ince) silikon uygulanmalıdır.
